Video recording by teams

Item: 1

Video cameras

Summary:

The FISU Technical Committee for Volleyball has re-examined the regulation regarding placement of team video cameras on the team statistician table during matches. Teams will be allowed to place one team video camera on the team statistician table by attaching it to the laptop computer or on a small tripod.

The camera:

- must be placed on the statistician's table
- may be raised to a maximum height of 50 cm above the statistician's table

Any camera that does not meet these requirements must be placed in the team video area.

Mark Tennant

FISU Delegate for Volleyball
